A friendly summer reminder about Swimming Pools...

Now that the snow has melted and the swimming pools are uncovered, please remember that all swimming pools are required to be surrounded by a barrier.

A “swimming pool” is defined as: Any structure intended for swimming or recreational bathing that contains water over 24 inches (610 mm) deep. This includes in-ground, above-ground and on-ground swimming pools, hot tubs and spas, or blow-up pools.

To ensure your swimming pool is in compliance, please contact our office. For the specific requirements regarding swimming pools, refer to Appendix G of the International Residential Code, New Jersey Addition, 2009.
