

JCP&L UPDATE

In order to enhance the reliability of the Bulk Transmission system, FirstEnergy Transmission Vegetation Management (FE-TVM) conducts an aerial patrol during the growing season, to identify any potential vegetation issues. FirstEnergy Transmission Vegetation Management will be conducting this Vegetation Management Aerial Patrol, this week, July 27 to July 31.

Please be advised that the Haverfield Aviation will be the helicopter company assisting in the inspections. The helicopter color is Black, Tail # N5027P

Pilot will be in communication with any local Airports, when in their airspace. The helicopter will be flying at a speed of about 35-40 mph above or alongside the lines, and may circle around for a closer inspection of an area of interest.

As always, poor weather and emergency patrols/repairs elsewhere may cause re-scheduling and/or delays.
