

UPDATE FROM MAYOR HAYES

We continue to work with utility companies to make sure power restoration efforts are completed as soon as possible. Although many residents who lost power during the storm had it restored over the weekend, there still remain a number of residents who are without power. We will continue our efforts working with both utility companies until all power is restored throughout the Township.

Bridgewater crews continue working throughout town moving downed trees and brush. As a reminder to all residents, the yard waste site is now open and you may drop off storm debris during regular working hours. Township staff is going around picking up storm debris and will continue this effort for the next two weeks. Brush should be piled curbside and limbs cut as small as possible.

Sincerely,

Mayor Hayes
