

Department of Engineering

Overview

The Engineering Division deals with a wide range of activities. Our main function is to assist and protect the public by reviewing development applications and monitoring construction for compliance with township codes and conditions of approval. We also work on township improvement projects, investigate and respond to a wide variety of questions and concerns such as construction, drainage, property surveys, street light outages, traffic, utilities, etc.

Available in our office are the official tax maps and zoning maps for your review or purchase. Soil Disturbance permits for disturbances greater than 5,000 sq ft and Street Opening permits are also available in our office or online.

[Click here](#) for the Soil Disturbance permits or [click here](#) for the Street Opening permits.
