**Presentation**

**GIRL SCOUT TROOP 61097**

Members of Girl Scout Troop 61097 made presentation.

Leila-

Made introduction noting the Girl Scouts live in Bridgewater-Raritan and are in sixth grade. They attend Eisenhower and Hillside Intermediate Schools and some have been in the troop since they were in kindergarten. One of the important parts about being in Girl Scouts is giving back to the community. In the past, they have done food drives, clean ups, baked cookies, donated back packs and entertained senior citizens. One important part about being a Junior Girl Scouts is the bronze award which they are finishing up after a few tough years due to COVID-19.

Natalie -

They earn the bronze award by completing a journey. They chose the outdoor journey which includes creating a take-action project based on observations of a local issue. This should be sustainable and should serve the community. As they completed their outdoor journey, one of their events was a trip to Scheeff Nature Preserve. The guide on the hike showed them a barn with a bat house and spoke about how important they are. As they later talked about their project, one idea was to build bat houses and place them in local parks as this is a sustainable way to help the community.

Emma-

One of the biggest reasons to install bat houses is for insect control. Bats can eat up to 1206 insects per hour. Once insects hear bats flying, they immediately start leaving that area so that helps reduce the number of bugs around a property. Bats are the best form of natural mosquito control. Mosquito bites can be annoying and itchy but they also carry disease so there are several important reasons to reduce their amount in our environment. Bats can also pollinate plants. Bees pollinate during the day while bats do it at night. Furthermore, bat poop is a good source of fertilizer.

Leila-

According to their research, the best place to build a bat house is near a water source. It should be placed at least 20-ft from the shore line and at least 20-ft away from the nearest tree line or large free-standing tree facing south east or south west where it will get 6-8 hours of direct sunlight. It should be 15-20 feet off the ground on a pole or post or building. Leila added it is not advisable to mount the bat box on a tree because it is easier for the predators to get them. They should be placed near a heavily trafficked area or near artificial lighting.

Veronica-

If the governing body approves their request to build bat houses for local parks, they will reach out to the park commissioner to discover the best place to put them and how many they can provide. They will then order the materials, build the houses and poles and hopefully have them in place by winter or spring. Bat houses can be installed anytime of the year though installation in the fall or winter allows time for any odors from building and painting them to go away. The bat houses are then ready when bats return from the winter destinations in search of summer housing. Veronica thanked the Council for listening to their presentation and hoped they would approve their proposal to build bat houses in local parks with guidance from the park commissioner.

Mayor Moench offered we can work with Public Works and the Park Board to get this done.

Councilman Norgalis made a motion to express their support of the girls scout proposal to build bat houses. Councilman Ring, seconded the motion. The vote carried on a unanimous voice vote.

**Joseph Boyle, 1796 Middle Road, Martinsville, NJ 08836**

Was present with several representatives from the Spring Run community. Requested that when the township gets around to paving their community, which consists of 85-homes, that it is done altogether as one instead of in sections as has been done in the past. He stated Spring Run community is a great place to live but their roads are deplorable and that residents are afraid of walking on the streets for safety reasons.

Mayor Moench stated that with the new Road Program initiative, we are doing entire neighborhoods at a time. The Spring Run Community has been a matter of discussion and doing it as a whole is much more cost effective.
